Rotating Bobbin Holder
(Export - White)

ROTATING BOBBIN HOLDER

- Fully closed 100% dust proof design with strong and rigid legs to achieve uniform yarn.
- Centered bearing with internal braking system to provide smooth rotation without any overrunning and creel stretch issues.
- Simple and improved ratchet mechanism to withstand variable load applied during loading and unloading of the bobbins.
- Consistent unwinding of roving for a long lifetime is achieved with permanent secured installation that never gets loosened during daily operations.
- Special grade plastic shock absorbent body and best suited for all top ring frame machinery brands & BTS.

NON-ROTATING BOBBIN HOLDER

- Stationary bobbin holders that can swing and tilt, enabling loading and unloading of the roving bobbin without any accidental damage.
- Smooth and frictionless locking and unlocking of the bobbins is ensured.
- Special grade plastic body and perfect solution to store reserve bobbins and BTS.
- Suitable for most of the leading ring frame machinery brands.

Non- Rotating Bobbin Holder
(Export - Blue)

Spindle Finger Brakes

SPINDLE FINGER BRAKES

- Optimal design with perfectly dimensioned twin brake shoes and centred clamping for a full complete grip on the rotating spindle. This achieves short braking time without any damage to the product thereby providing long service life.
- Carefully curated with high quality virgin material for a flawless finish and to meet international quality standards.
- Christilda offers a wide range of spindle brakes suitable for leading spindles used in current market including – LMW M19, M18.5, HL, M21, LR9AXL (24.2mm), Texpart, KTTM, etc. Apart from these types, Spindle Finger Brakes can be customised for any given dimension per your requirement.
